LG2 – Horticulture

- Create a collage of your ideal garden. This can be done on the computer using images copied and pasted from the internet or can be done on paper using images from newspapers, magazines and leaflets. You could even use leaves, petals and twigs from your own garden if you have one. Be creative!
- Try the activity on the 'Plants from your kitchen' worksheet. You could plant the seeds in an empty eggbox or yoghurt carton if you don't have any pots at home.
