LG2 - Maths

- Using the Argos catalogue website create a birthday wish list (there is no price limit!)
- Copy and paste images into a word document.
- Write down the price of each item.
- Put them in order of price from cheapest to most expensive.
- Add up the total cost of all the presents. How much will they cost?
- Now you have been given a budget of £100. What will you have to get rid of to keep within budget? Prioritise what you want the most!
- Compare the prices with other online stores, can you find them cheaper elsewhere? How much will the total be now? Can you get more for your budget?
