

Environment and Community

What are we learning?

We are exploring our local community and how it changes across the seasons. How does it look? What can we see? How do the trees look? What is on the ground? How is the weather? Can we be creative with what we can find?

Activities to do at home:

- Go outside, collect leaves and other autumnal items
- Make a collage of what you have found
- Make Autumn pictures and patterns
- Use paint to paint the leaf and create printing art
- Help sweep up the leaves in the garden
- Plant autumn bulbs
- Use the autumn checklist to go on a autumn treasure hunt, what can you find?
- Use the tree outline to design your own autumn tree – what do the leaves look like? What colour are they? Collect leaves and make your own or use paint to make it.
- Go out and find the leaves that match the colouring sheets, colour them in and use the internet to find out what types of leaves they are.
- Complete the autumn wordsearch sheet.

Maybe take photos of what you have done to bring into school and share with everyone or email to me on jroscoe@mhs.bfet.uk.
