

## Maths Remote Learning: Mathletics

Mathletics is an engaging online math program made for hybrid classroom and home learning.

It can be accessed on any browser or download the app in your appstore.

Students have their own individual login...

Students will be assigned tailored tasks within different topics, that complement and enhance their in-class learning

Students are set fun activities to practice and gain fluency. They can repeat these tasks if they want to improve their score.

Students will also be set tasks that challenge their thinking with problem-solving and reasoning questions.

Mathletics Number & Algebra: Addition & Subtraction Game over

Show my work Message teacher

Check my answer Finish

	Game 1	Game 2	Game 3	Total
Max	15	<input type="text"/>	10	<input type="text"/>
Lachlan	<input type="text"/>	44	<input type="text"/>	80
Tom	12	<input type="text"/>	<input type="text"/>	74

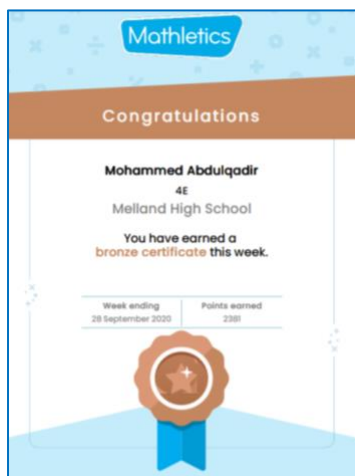

Students can show their working out on Mathletics (by typing, recording, scribbling or taking a photo of their work).

They can also communicate with their teacher via Mathletics (by voice recording or typing)

Write Record Scribble

Write question Record question

Once assigned tasks are completed they can choose to play on 'mathletics live' competing against classmates or their peers around the world whilst developing their mathematical fluency.

Participation and improvement are monitored.

Students learning is rewarded with points and certificates (that build up from bronze, to silver and then gold) – wherever they might be.
